Chicago Dec 21 1887

Hon. James R Snowden
Dear Sir. —

Will you kindly oblige me by informing me what metal or metals is used to alloy American gold coin and what have been the changes in kind and proportion of alloys used — with the dates of such changes

Italy

L. J. Gildersleeve

Were you likely to remember me would allude to pleasing recollections of your genial face and kindly expressions in a Methodist Sunday School in Franklin when I was a very small boy — I also remember courtesies at the mint — These recollections cover forty or more years yet I know that were I to meet you now I should recognize the same pleasant countenance. L.J.G.
